

Prepare your students for success with creative, engaging learning experiences

Adobe Creative Cloud and Adobe Express build your students' creative skills and confidence so they can communicate effectively, think critically, and express themselves creatively for the careers of the future.

K–12 students and our education system face a rapidly changing world.

The modern workplace is undergoing big changes, and education is evolving to meet the demands. As schools navigate in-person and hybrid classes, they are integrating additional technology across subjects and focusing more on higher-order skills to get students ready for college and careers.

Prepare students for the future with Adobe solutions.

Creative Cloud offers over 20+ creative apps and related services that give students a comprehensive, digital makerspace to bring their stories and ideas to life. Adobe Express for Education includes the Adobe Express app plus Adobe Photoshop Express and Adobe Premiere Rush, so students can take their photos and videos to the next level and build their creative skills.

Here's how Creative Cloud and Adobe Express meet students' and teachers' needs, from school to college and career:

Created with students and teachers in mind

We've developed our newest generation of apps with students and teachers in mind. Adobe Express gives students and educators everything they need to confidently create stunning graphics, flyers, photos, presentations, web pages, and videos. And Premiere Rush makes it easy to shoot, edit, and share high-quality videos for class assignments, school publications, clubs, and more.

Exclusive education discount

We've made it affordable by lowering the Creative Cloud pricing for K–12 schools and districts (300 minimum purchase per school or 2,500 per district). Now schools can give these tools to every student for use in any class, including science, history, English, and art.

Scaffolded for student growth

Students build creative competency and grow their skills over time. Students who start in earlier grades with Adobe Express gain confidence in creating graphics, web pages, videos, and more. In later grades, teachers can introduce apps like Premiere Rush for video, Photoshop Express for photo editing, and Adobe XD for web and app design to build on these skills and prepare students for their careers.

Find free resources and an expansive community of educators.

The Adobe Education Exchange is the free learning platform and community, with workshops, self-paced courses, and resources, all designed by educators for educators, to ignite creativity in the classroom.
