

Adobe Creative Cloud

Prepare students for success with Adobe Creative Cloud

Higher education overview for VIP customers

Empower your students and elevate your institution with the right AI and creative tools.

Engage students in their learning, give them skills that will get them hired, and make your institution stand out to prospects by providing equitable access to Adobe Creative Cloud.

Engage students more deeply for better learning outcomes.

Studies show that when institutions integrate Adobe's AI and creative tools into courses across disciplines, students put more effort into their learning and feel more confident about their work—earning better grades and driving higher retention.

Prepare students with in-demand career skills.

Hiring managers want graduates with creative and AI skills. By teaching students to communicate and collaborate using Adobe's industry-leading apps, you can help ensure that they're workforce-ready—and that they can showcase their skills to potential employers.

Drive enrollment with a focus on innovation and creative skills.

Prospective students want to attend forward-thinking institutions. By adopting Adobe solutions, you can make it clear that you understand cutting-edge technology and digital communication, and that you're committed to launching students into their dream careers.

Solutions for every challenge, every workflow, and everyone on campus.

Industry-leading desktop and mobile apps

Creative Cloud for enterprise provides ongoing access to professional creative tools used throughout the modern workplace. It includes favorites like Adobe Photoshop, Illustrator, Premiere Pro, and Acrobat as well as new apps and features like Adobe Firefly generative AI for easy content generation and Adobe Express for career-ready visual communication. The Creative Cloud higher education plans include access to Adobe Substance 3D apps at no additional cost as well as integrated mobile apps, cloud services, and tutorials.

Connected assets and secure sharing

Creative Cloud Libraries streamline collaboration by letting students, faculty, and staff access and share files, fonts, colors, images, videos, prototypes, and other assets right inside their Creative Cloud apps.

High-quality, royalty-free stock assets

Students, faculty, and staff can browse, preview, and license millions of beautiful Adobe Stock assets like images, graphics, and videos—right inside their Creative Cloud apps. If they need more, they can license additional stock assets by department or course, or purchase Creative Cloud Pro Plus for enterprise to get downloads of assets from the Adobe Stock standard collection, which includes more than 200 million royalty-free photos, vectors, and illustrations.

Shared Device Licensing and easy administration

Shared Device Licensing enables students, faculty, and staff to access the foundational power of Creative Cloud desktop apps and supported online services in shared environments like labs, libraries, and classrooms. IT admins can easily configure and support multiple profiles by Active Directory OU, LAN IP(s), or installed package. The web-based Adobe Admin Console makes license management simple.

24x7 support and powerful data protection

It's easy to stay productive with onboarding assistance, 24x7 technical support for end-user troubleshooting, and consulting sessions with Adobe product experts. And Creative Cloud for enterprise helps protect everyone's data with in-transit and at-rest encryption.

Simplified student asset migration

When they graduate, students can easily migrate their assets from school-assigned accounts to free Creative Cloud membership accounts that include trial versions of most of Adobe's creative apps. They can also easily upgrade to get full versions of all the apps and services that were included in their school accounts.
